Chairman Dell confirmed with Mr. Busby that he has been informed that not all of the right-of-way’s that cross the property have been designated. Mr. Busby stated that is Correct. Chairman Dell asked if Mr. Busby would like to talk about the Water supply and the sewage collection plans for the houses. Mr. Busby stated that they did not show that on the plans because they thought they would get direction from the Town exactly what they require and that they are expecting a separate water & sewer hookup for each property to the municipal system. Mr. Busby stated that they will be using Schrock for the water and sewer work, that the town uses Schrock quite a bit and that it will be to the Town’s satisfaction. Chairman Dell stated that he is aware that there is a well on the property. Mr. Busby stated that, there is a well on the property, they have not done anything with it and he is not sure if it works. Mr. Busby stated that they were hoping to use the well as irrigation if it did work but Town Manager Savage has told him that is not an option but he will abandon the well if required. Chairman Dell asked Mr. Busby if he understand that items 44, 45, 46, 49 & 58 which deal with soil erosion and grading plans will be required at the building permit process time. Mr. Busby stated that there is a grading plan, that it is a very flat lot and it is for Soil Conservation. Mr. Dell stated that the very last item on the check list has to do with parking and that the suggestion is that Mr. Busby widen the driveways to 20 feet. Mr. Busby stated that, that
actually missed his review, it shows the driveway at 18 feet but the garage will most likely be 27 feet wide. Mr. Busby stated that the driveway could possibly end up being 27 feet wide but it will be at least a minimum of 20 feet to achieve the two (2) parking spaces. Ms. Correll stated that these were two lots at one time.
