Bridgeville, DE 19933

Subject: Planned construction activity for Bridge 3-146

To Whom It May Concern:

The Delaware Department of Transportation (DelDOT) is currently designing improvements to Bridge 3-146, which carries N. Main Street over the Bridgeville Branch. Based on available records, your property line appears to be within the project work zone. To perform this work, DelDOT will need access to properties that lie within 50 feet of the box culvert. All work will occur within the streambed and will not affect other areas of your property.

DelDOT intends to begin this work later this summer. The work is estimated to take 4-6 weeks for full completion. If you have no objection to DelDOT performing work within the streambed of the Bridgeville Branch that may extend into your property, no further action is required. DelDOT will notify you prior to the start of construction.

If you object to DelDOT performing work within the streambed of the Bridgeville Branch that may extend into your property, please respond in writing with your concerns. Responses must be postmarked no later than Friday, May 22, and sent to:

Delaware Department of Transportation
Division of Transportation Solutions
