Each year we have what's called our community wellness day. This year it will be held on August 15th beginning at 10:00 AM. We invite all citizens and some service organizations to participate. They range from the county library through medical providers. Our intent is to convey to our community that services are available, many times just a phone call away.

We have invited from the town of Bridgeville, the fire and rescue services, the library and the police department. We also invite you and any staff and service organization that service the town. We have space for setup of an informational station where literature pertaining to the town could be provided.

Upon your response you'll be added to our event list.

Looking forward to hearing from you.

Roger Fenwick
